Recent Projects

Ensemble

Created a live audio/video application for musicians to play music across the globe. Users can register, login, and make a video call to another. Designed with HTML5, CSS, JavaScript, Rails, and Kandy IO's API.
https://github.com/chakafasano88/chatmusic

Urban Snooze

An application allowing urban professionals to create appointments, and schedule sleep pod naptimes. Designed with HTML5, CSS, JavaScript, and Ruby on Rails.
https://github.com/chakafasano88/urbansnooze

Audio Player

This application accesses Soundcloud's API, allowing users to cycle through songs with the click of a button! Users can play, pause, skip to the next track, and revert to a previous track. In addition, album name, description, and artwork are displayed.
